

DISABLE POPUP BLOCKER INFORMATION

Most web browsers (such as MS Internet Explorer®, Firefox® and Safari®) incorporate popup blockers that prevent the launch of popup windows. Unfortunately, these popup blockers also prevent the launch of tutorials in Intuition Rubicon. Other pop-up blockers may be associated with the Internet service provider you are using or Internet security software (such as Symantec Norton™ Internet Security, McAfee® Internet Security and similar).

In order to ensure the best experience when using Rubicon, it is recommended to disable all popup blockers for this site. Please refer to the vendor documentation for further information or contact your local IT support team for assistance about enabling popup windows for your Rubicon LMS site.
